

## Taking care of your eyes is a family matter

Dr. Nicole Anderson-Weiss has joined her father, Dr. C. Joseph Anderson and Dr. Michael B. Shapiro at Anderson & Shapiro Eye Care.

Dr. Anderson-Weiss is a graduate of Emory University School of Medicine in Atlanta, where she also completed her ophthalmology residency training. She spent a year as a research fellow sponsored by the National Institute of Health/National Eye Institute, studying corneal physiology and ocular toxicology. She was awarded the Heed Ophthalmic Foundation Scholarship to support her fellowship training in cornea, external disease and refractive surgery. She was in private practice for 6 years in Mississippi before relocating home to Wisconsin. She has authored numerous papers in peer-reviewed journals and has presented to national and international audiences.

What Dr. Anderson-Weiss enjoys most is the relationships she establishes with her patients. "What is special about Anderson & Shapiro Eye Care is that we strive to give personal care to every patient. It truly is a family-type atmosphere." At the same time, Anderson & Shapiro has always been on the cutting edge of technology. "We are now able to offer patients more than we ever have in the past with intraocular lenses that correct the need for reading glasses, to cutting edge technology to correct astigmatism. It's a very exciting time for patients and doctors alike."
